our fabric masks follow the government recommendations for facial coverings during day-to-day

activities. according to CDC and other global health leaders,

symptoms can be a major cause in spreading the disease wearing a cloth mask or facial covering helps in reducing the transmission of the disease

was these masks with regular soap or detergent (after every use) but dry them thoroughly and store in a cool dry place.

Precautions:

wash the mask after everyday use

the mask is for individual use only to prevent contamination do not share it with others
change the mask if there is difficulty in breathing

How to wear

step 1 hold ear strings by your hands, face the concave side

step 2 pull the strings over your ears, cover your nose mouth and chin with the mask properly

step 3 - adjust the mask to ensure a perfect fit

step 4 do not touch the outer surface of the mask while in use
